Index

A

Actinomycin D, inhibition of vitamin D- and dihydrotachysterol-induced responses in the chick, 405.

Activity, physical, and carbohydrate metabolism in rats fed diets of purified casein vs. mixture of amino acids simulating casein, 63.

Aflatoxin, effect of dietary modifications on response of duckling, 123.

Agaricus bisporus (champignon), effect on cholesterol levels in rats, 371.

Age, vitamin B_6 deficiency, isoniazid and deoxypyridoxine, effect on urinary taurine of rats, 13.

AHRENS, RICHARD A., AND JAMES E. WILSON, JR. Carbohydrate metabolism and physical activity in rats fed diets containing purified casein versus a mixture of amino acids simulating casein, 63.

Alfalfa lipids, isolation of compound that inhibits tocopherol deposition in chick tissues, 199.

American Institute of Nutrition, Proceedings of 30th annual meeting, 101.

Amino acid(s) activation in liver of growing rats maintained with normal and with protein-deficeint diets, 25.

— — (D-), utilization for growth by *Drosophila melanogaster* larvae, 31.

— —, effect of dietary modifications on response of duckling to aflatoxin, 123.

— —, essential, deficiencies, effect on amino acid pools in rats, 228.

— — (essential, dietary)-to-total nitrogen minimum ratio, determination for beef protein fed to young men, 416.

— — incorporation in rat liver cell-fractions, effect of methionine-deficient diet, 91.

— — in postprandial gut contents of man, 291.

— —, mixture simulating casein vs. purified casein diets, carbohydrate metabolism and physical activities in rats fed, 63.

— — requirements in a defined media for chick embryos, 175.

Anorexia, effect on weights and water levels of body organs of rats, 354.

Antibiotics, effect on nitrogen and amino acid retention in rats fed raw navy beans, 191.

Aortas of adult male rats, dietary carbohydrates and possible pre-lesion biochemical changes, 275.

α-p-Chlorophenoxyisobutyrate, effectiveness as hypercholesterolemic agent in suckling rat hypercholesterolemia, 40.

APPLEBAUM, SHALOM W. Digestion of potato starch by larvae of the flour beetle, *Tribolium castaneum*, 235.

L-Arabinose and D-xylose, metabolizability and nutritional implications for chicks, 207.

Arginine-lysine antagonism in the chick and its relationship to dietary cations, 364.

Assays (bio), vitamin K in chicks, with Russell's viper venom, 97.

Atherosclerosis in swine, effect of dietary fat, protein and cholesterol, 183.

Auricularia polytricha (Jew's ear), effect on cholesterol levels of rats, 371.

AUSTIC, R. E., C. R. GRAU AND G. C. MATTESON. Requirements for glucose and amino acids in defined media for chick embryos, 175.

AZZAM, S. A. See Cowan, J. W., 423.

B
